### BENEFITS OF SOLAR:

There are several important benefits to a new PV System including:

- It uses a **RENEWABLE** source of energy that is produced by the Sun
- It produces electricity **CLEANLY & QUIETLY** without air pollution emitted into the atmosphere
- It produces your own electricity **ONSITE** that can be **STORED** in batteries for use as needed

## **LIGHTRAY SOLAR™**

To find out what a SKY ENERGY® **LIGHTRAY SOLAR™** PV SYSTEM will look like on *your* home, fold or cut around the number of panels that you estimate you may need and hold it up on an angle in front of your roof to see for yourself!

### AND MORE...

SKY ENERGY® can also assist you in specifying a variety of commercially available equipment for custom solutions to best meet your needs including solar panels of *varying* sizes, *micro* inverters, internet accessed *communications gateways*, ground mounted *solar trackers*, and *battery backup* systems. Please contact the company for more information.

*Note: Color & style of solar panels may vary from what is shown. Panel specifications, dimensions, and warranty information is provided with plan and is also available upon request.*
