

COMPANY INFORMATION:

SKY ENERGY, INC., is a clean, renewable energy company based in Greenville, South Carolina, that was conceptualized in 1997 by Brian Weninger, incorporated in 2002, and launched in 2004 to market and sell wind energy generated in the US nationwide and other forms of clean energy to businesses, universities, municipalities and residential customers through Renewable Energy Credits (RECs).

SKY ENERGY[®] was incorporated for the following purposes and *more*:

- Enable customers to choose & purchase renewable energy even in areas that did not have access to it
- Plan & invest in new renewable energy projects
- Improve air quality by reducing Green House Gases (GHG) & emissions
- Reduce dependence on foreign oil & fossil fuels, and nuclear energy
- Meet corporate & campus sustainability initiatives
- Meets Green Power Partnership requirements established by the US EPA
- Also meets Energy & Atmospheric Green Power requirements by the US Green Building Council for LEED certification
- Distribute & install existing clean energy technologies including solar
- Develop & manufacture new clean energy technologies (future)
- Offer adventure & informational tours of installed wind turbines (future)
- Research automotive applications & form racing teams (future)

WIND ENERGY

SKY ENERGY[®] markets and sells wind energy through branded **WIND-E[®]** Renewable Energy Credits or RECs, which are the environmental attributes of zero-emission, 100% renewable energy as it is generated in the US. RECs are measured and typically sold in *kilowatt-hours* (kWh) to residential customers and in *megawatt-hours* (MWh) to large corporations and larger electricity users. They provide buyers with the flexibility to choose a renewable source of energy, the quantity needed, and to offset or reduce their emissions. SKY ENERGY[®] provides renewable energy generated from wind farms and wind power plants nationwide to provide its customers with the lowest costs and highest benefits possible.

FIGHTING POLLUTION ONE REVOLUTION AT A TIME®

BUSINESS SERVICES:

SKY ENERGY® also offers the following business services to clients on an hourly fee or project fee basis:

- **Environmental Consulting** - renewable energy needs & goals, energy efficiency improvements, and greenhouse reduction strategies
- **Design & Planning** - solar panel grid layout & wind turbine placement
- **Advertising & Promotion** - marketplace strategies for new customers
- **Financial Analysis** - system cost & breakeven analysis or additional cost considerations
- **Project Management** - scheduling & contractor coordination for project construction
- **Marketing & Sales** - creating a new marketplace by finding buyers & sellers both regionally and nationally
- **Branding** - certification services to select renewable energy generators

DID YOU KNOW?

| | | |
|---|---|---|
| <p>The average U.S. residence</p>  | <p>Consumes 10,000 kWh of electricity each year</p> | <p>Power plants emit 13,700 pounds of air pollution each year to generate it!</p> |
|---|---|---|

According to the U.S. EPA

***We hope that you see the importance of renewable energy and the value that SKY ENERGY can bring to your organization!
