BENEFITS OF SOLAR:

There are several very important benefits to a PV System including the following:

- Solar is a **RENEWABLE** source of energy that is created by the Sun
- Solar energy is produced **CLEANLY & QUIETLY** without air pollution being emitted into the atmosphere
- Solar energy can also be produced **ONSITE** and can be **STORED** in batteries for use at a later time

To find out what a SKY ENERGY® **PV System** will look like on *your* roof, fold or cut around the number of panels that you estimate you will need and hold it up on an angle in front of your roof to see for yourself!

Note: Color & style of solar panels could vary from as shown. Panel specifications and dimensions will be provided with plan and are available upon request.
